Thank you for choosing DESIGNERS FIRST.

## Installation instructions

### Congratulation on your new CANVAS.

Please familiarize yourself with this set of  
installation and care instructions before using  
the product.

### CANVAS

by Anna Karnov  
& Clara Mahler

## Installation:

In addition to the included hardware and tools, you will also need a power drill, 8 mm (5/16") drill bit, and a level.

- 1 Find and measure the desired height of your CANVAS table and subtract 1 cm ( $\frac{25}{64}$ ). This measurement will be the height of the two holes for the screw anchors.
- 2 The center distance between the two holes depends on the purchased table-top size.

100 cm table-top -> A = 978 mm center spacing  
115 cm table-top -> A = 1128 mm center spacing

## Advice:

Take care not to mount in the cement if installing on a brick wall.

CANVAS has a solid construction and is very strong in itself. However, do not mount on thin drywall unless mounting directly into the studs.

## Cleaning and care of CANVAS:

### Linoleum surfaces:

#### Daily cleaning

Use a moist cloth to wipe down the surface daily.

#### Maintenance

With proper care and maintenance, a linoleum surface can withstand decades of use. Use a linoleum flooring cleaning product, which will leave a protective layer on the surface.

### Oil treated oak

#### Daily cleaning

Use a moist, microfiber cloth to wipe down the surface. Do NOT use any cleaning solvents or chemicals.

#### Maintenance

Treat the CANVAS as needed with wood or teak oils multiple times per year to keep it clean from filth and fluids.
