

Installation instructions

Congratulation on your new LEVEL.

Please familiarize yourself with this set of installation and care instructions before using the product.

We are always ready to answer any questions on our customer support hotline +45 42 45 44 00, and you are also welcome to email us at info@designers-first.com.

Thank you for choosing DESIGNERS FIRST.

LEVEL
by Trine Poulsen

Installation:

In addition to the included wall anchor and screws, you will also need a power drill, 8mm (5/16") drill bit, and a level.

Find your desired location for your LEVEL.

- 1 Measure the distance between the mounting holes on the backside of your LEVEL
If you bought a **short** version (50 cm), the center to center distance is 28 cm.

If you bought a **long** version (65 cm) the center to center distance is 43 cm.

- 2 Mark two mounting locations on the wall, making sure they are level. Use the correct distance from (1).
- 3 Drill 2x8 mm (5/16") holes to about 4 cm (1 5/8") deep, and taking care not to mount in the cement if installing on a brick wall. Install the two wall anchors. If installing on drywall, use special wall anchors, not included.
- 4 Install the two screws, leaving 3-4 mm (1/8" to 5/32") space between the head and the wall.
- 5 Mount your LEVEL on the screws. Adjust the screws until your LEVEL is perpendicular to the wall.

LEVEL cleaning and maintenance:

Daily cleaning

Clean with a moist, microfiber cloth to wipe down the surface. Do not use any chemicals or detergents.
