Thank you for choosing DESIGNERS FIRST.

## Installation instructions

**Congratulation on your SILHOUETTE.**

Please familiarize yourself with this set of installation and care instructions before using the product.

**SILHOUETTE**  
by Sabine Appel

## Installation:

In addition to the included wall anchor, screws, and installation template (1:1 size), you will also need a power drill, 8mm (5/16") drill bit, and a level.

The shelf will feel wobbly in regards to its shape when you hold it in your hand. This wobbliness is due to the multiple perpendicular bends and the stylish aluminum. However, the shelf will achieve its designed shape and stability once correctly installed on the wall.

---

Place the installation template on the wall at the desired location of the SILHOUETTE shelf. If needed, use a piece of tape and take that it is level.

If possible, do not mount in the mortar if installing on a brick wall, as this can cause the screw anchors to get loose over time.

Note. If installing on drywall, use special wall anchors, not included.

Drill 8mm (5/16") holes as indicated on the template, approximately 4.5 cm (1 3/4 inch) deep. Insert the wall anchors and torque in the screws.

## Cleaning and maintaining the SILHOUETTE shelf

We recommend using a moist or dry microfiber cloth to wipe down the surface. Do not use any chemicals or detergents that contain any degreasing agent.

**Never use any** abrasive cleaners, as they will scratch the surface.
